SYED MUHAMMAD SOHAIB

SOFTWARE QUALITY ENGINEER | QA ENGINEER | MANUAL SOFTWARE TESTER

0319-6150494 • smsoohaib@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented Software Quality Engineer with a strong foundation in manual software testing and the software development and testing life cycles (SDLC/STLC). Skilled in designing and executing test cases, reporting defects through the bug life cycle, and applying structured test design techniques to ensure software quality. Comfortable working in Agile/Scrum environments, with hands-on experience in API testing using Postman and a Computer Science background. Focused on delivering reliable, high-quality software through analytical thinking and thorough attention to detail.

TECHNICAL SKILLS

Testing Types: Manual, Functional & Non-Functional, Regression, Retesting, Smoke, Sanity, Exploratory, Ad-hoc, Positive & Negative, Black-Box, White-Box (Basic)

QA Process: SDLC & STLC, Test Case Design & Execution, Test Scenario Creation, Bug Reporting & Defect Life Cycle, Agile & Scrum Methodology

Test Design Techniques: Boundary Value Analysis (BVA), Equivalence Partitioning (EP), Decision Table Testing, State Transition Testing, Use Case Testing

API Testing: Postman

Database: SQL (Basic Queries)

Tools: Postman, Microsoft Excel, Microsoft Word

PROJECTS

Smart Printer App
Kotlin (Android)

- Developed an Android application in Kotlin enabling users to manage and control printing tasks from a mobile device.
- Designed and executed test cases covering functional, positive, and negative scenarios to validate core app features.
- Documented defects and verified fixes through the defect life cycle, improving overall app stability and usability.

EDUCATION

Bachelor of Science in Computer Science (BSCS)
Government College University , Faisalabad 2022-2026
